Welcome to our latest product catalogue which reflects many changes and improvements in our wide range of food packaging.

In ever more competitive manufacturing and trading conditions across the world, Colpac continues to demonstrate the quality credentials that have stood it in such great stead over the years.

Sustainability is clearly a key theme in today's political and social environment, and we at Colpac take this very seriously. We are committed to ensuring that all our product development takes full account of environmental legislation in different countries, which is in itself an increasingly complex undertaking. Sustainability is embedded in the way we think and in the way our business culture performs. Furthermore, we are committed to our net zero programme encompassing various stages all the way through to 2045, working towards targets validated by the Science Based Targets initiative.

We have recently been awarded the BRCGS AA+ certification, and this supports our effort to develop and maintain our leadership in quality, health and safety, and of course food packaging product safety in our sector of the market.

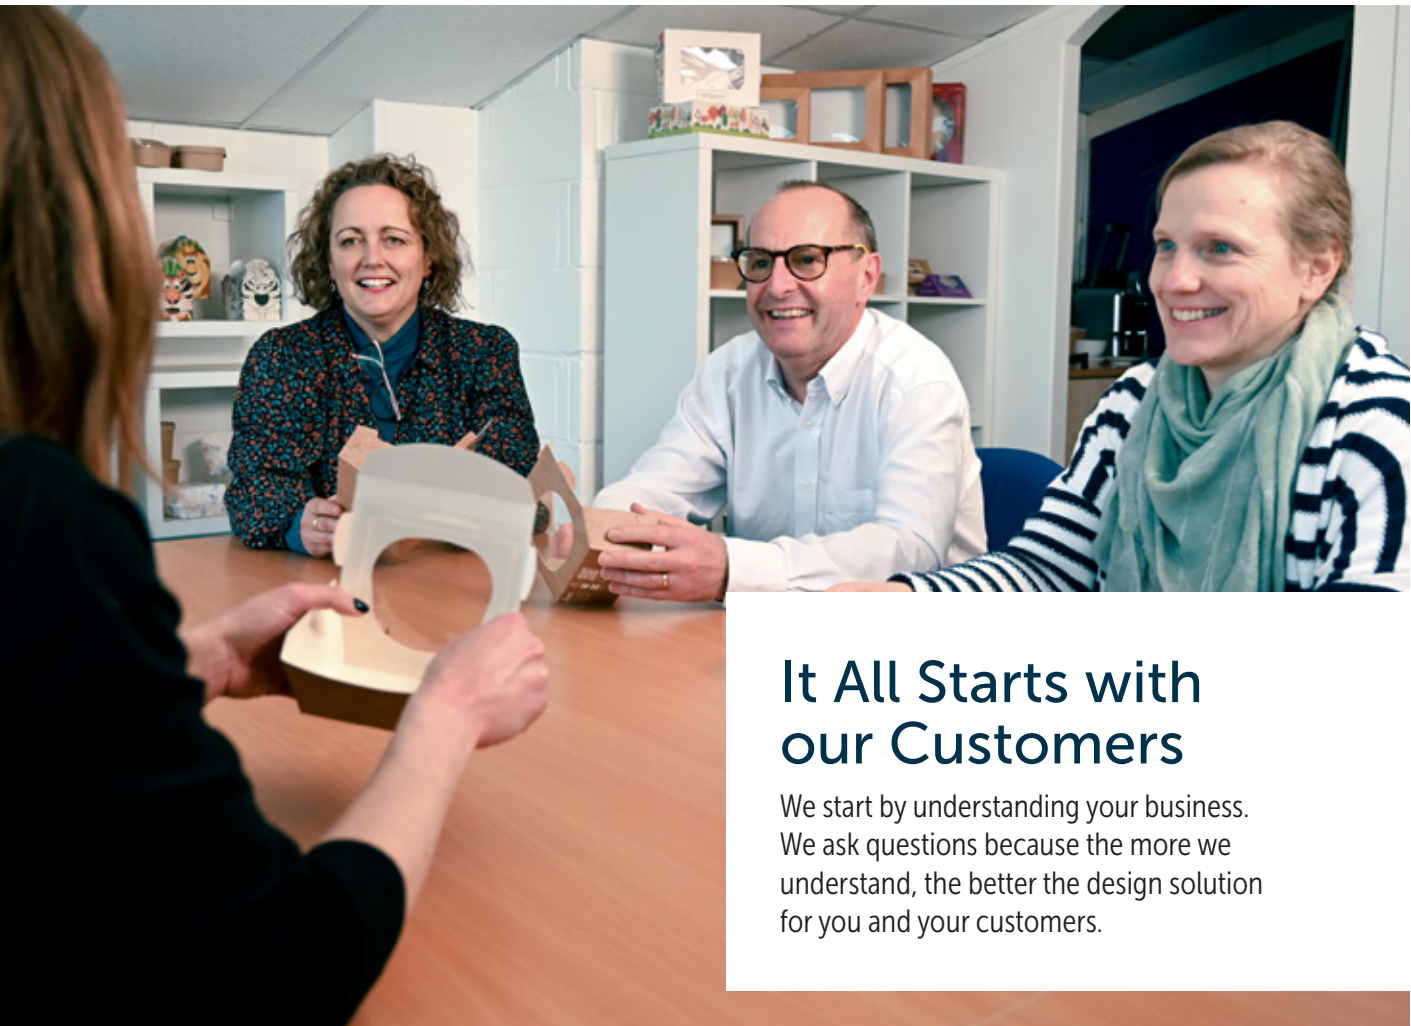

Behind the scenes, we continue to research into new materials, coatings, inks and glues in an effort to improve the ability to recycle and compost to realise the circular potential of our products.

Our innovative approach means we can take the risk out of your packaging development projects. Whether you select products from our extensive off-the-shelf range, or work with us to create 'something new', partnering with Colpac will enable you to access a wealth of knowledge and experience from our specialist teams.

As ever, we would like to thank our customers, old and new, for your continued confidence in us. We look forward to working with you in the future.

We are a UK Designer and Manufacturer of Paperboard Food Packaging

Our ranges of food packaging are specifically designed to consider all points within the supply chain. We undertake thorough materials testing and our products have declarations of compliance to confirm food packaging safety for given applications.

It All Starts with our Customers

We start by understanding your business. We ask questions because the more we understand, the better the design solution for you and your customers.

Agile Manufacturing

With one of the most flexible cartonboard factories in Europe, we accommodate a variety of processes and technologies. This enables us to flex production to suit customer demand, be creative, and cater to more unusual requirements.

Innovative Materials & Suppliers

We collaborate with our materials suppliers to develop new board types and coatings. Our network provides us with exclusive access to materials, so we can provide you with a unique selling point.

Watch our company video

People & Culture

Our people and culture drive the development and creativity of our service and products. Our collective knowledge, skills and passion deliver unique and differentiated packaging for our customers.

We Prioritise Quality & Compliance

We are committed to designing and manufacturing quality products and we look to continuously improve and lead the industry. Our certifications provide reassurance to customers across product quality, health and safety, sustainability, and industry standards.

Food Safe Packaging

We adhere to rigorous processes to assure the safety and reliability of our products, from design and development, through manufacturing, to end-use.

We also work with testing partners to certify the functionality and safety of our packaging across common customer use cases. All our product claims are backed up by declarations of compliance and specific material testing.

Sustainability Certifications

Our sustainability certifications and memberships demonstrate continuous monitoring and improvement of environmentally conscious processes, sustainable sourcing of materials, designing for recycling, and adherence to recycling guidelines. Look for our FSC® certified products.

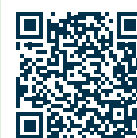

Industry Memberships

We have various packaging industry memberships and are actively involved in associations that support the packaging sector.

These memberships facilitate our contribution to industry standards, environmental initiatives and policy discussions in packaging and manufacturing.

Read more about our certifications

We are Committed to Product and Business Sustainability

This includes championing sustainable sourcing, utilising eco-design principles, running efficient and agile manufacturing processes, and implementing rigorous compliance standards and responsible business practices.

Product Sustainability

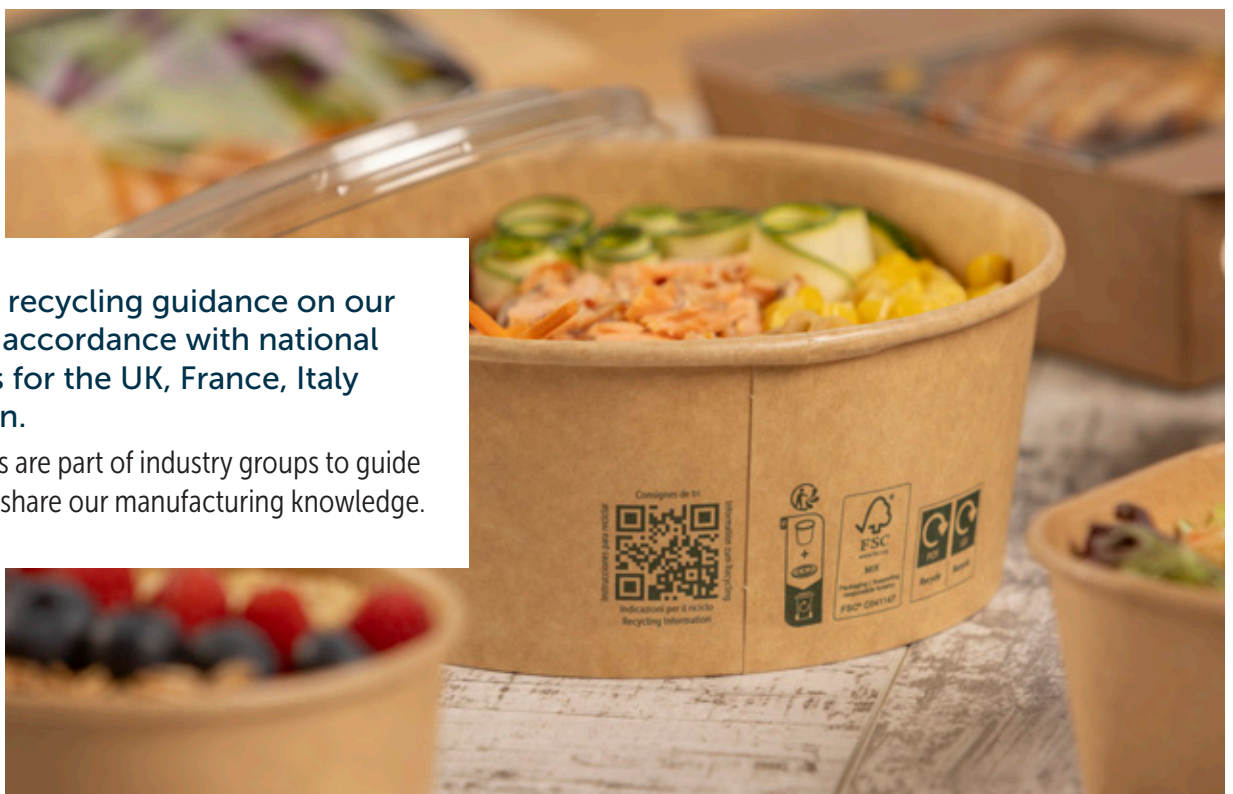

We consider several key elements around product sustainability:

- Sustainable sourcing
- Considered design
- Reducing impact
- Reducing food waste

We print recycling guidance on our packs in accordance with national schemes for the UK, France, Italy and Spain.

Our experts are part of industry groups to guide policy and share our manufacturing knowledge.

Download our
ESG report

We invest in environmental and social sustainability by:

- Using 100% renewable energy in our UK factory
- Optimising our factory and energy saving
- Sending zero waste to landfill
- Supporting the Wildlife Trust
- Donating packaging and fundraising for charity

Net Zero Programme

We have partnered with Inspired Plc to develop our net zero programme, including setting targets and achieving validation from the Science Based Targets initiative.

SCIENCE
BASED
TARGETS

DRIVING AMBITIOUS CORPORATE CLIMATE ACTION

**Scope 1
net zero**

**Scope 2
net zero**

**Overall
net zero**

Carbon reporting is not yet mandated for companies of our size, and we hope that we will inspire other manufacturers to take decisive action.

INSPIRED
PLC

We Help You to Innovate Without Risk

We continuously improve and innovate our packaging through new and existing product development. Our packaging designers, sustainability experts, food safety and quality leaders, production teams, and dedicated account managers come together to deliver value-added solutions.

Design

Our in-house design team creates unique packaging construction concepts and eye-catching graphic layouts to promote your brand.

Our design team was runner up for the Foodservice Packaging Association Design Team of the Year award in 2024.

Custom Manufacturing

Through our bespoke process we advise you on the optimal packaging materials for your product. To support your product launches, we can conduct packaging trials at our BRCGS AA+ certified UK factory before progressing to full-scale production.

CASE STUDY

See Strathmore Foods case study which demonstrates material choice.

Creative Heritage

We are known for bringing new packaging concepts to the market. Our Fuzione® salad box range won the FPA Product Innovation award in 2010, and our compostable Zest™ range won the New Product award at The Sammies in 2015. This was particularly exciting as we were the first to bring compostable food packaging to the market in the 1990s.

In 2021 we were Sammies award winners again with our Stagione® products. We continuously evolve this incredibly popular range, the latest addition being our new Stagione® Light product line.

packaging
webpage

Travel

We create specialist food packaging for markets such as travel. This involves designing recyclable packaging for on-board meals that improves handling and logistics, as well as delighting passengers.

Labels

Labelling is a cost effective solution to convey your brand messaging and product information, helping packs to stand out on-shelf. We can work with you to design your labels to work with our packaging.

SANDWICH PACKAGING

Sandwiches continue to be an extremely popular lunch option and the ranges of breads, fillings, shapes, and sizes are ever expanding. This means a wider assortment of sandwich packaging options are required to cover the variety of offerings on the market.

Colpac's sandwich packaging offers solutions with options to recycle or compost, and to reduce the use of plastics. With recent media attention on single use, heavily littered packaging, our ranges provide choices to fit into accessible waste streams.

Convenience is still extremely important to consumers; they demand simple yet robust packaging to protect and preserve their food. We offer an extensive range to cater for the variety of sandwich options on the market. These include traditional triangular sandwich skillets (front and rear-loading), wrap packaging, baguette and bagel packaging and hot sandwich packaging.

Formats and Visibility

Sandwich packaging needs to be easy to fill, by hand or at scale. Product visibility is key for on-shelf appeal for the consumer, and packs must be simple to open and eat from.

We produce an array of sandwich packaging formats that are designed for purpose with secure closures.

These include:

- sandwich wedges
- square sandwich packs
- wrap packs
- sandwich bags
- hot sandwich packs
- platters

Shelf-Life and Preservation

Reducing food waste is a major topic in improving the sustainability of today's food-to-go market. We make packaging for longer and extended shelf-life, so products can remain fresh over wider distribution chains, and last longer, so are less likely to be wasted.

SAME DAY SANDWICH PACKS

We offer an extensive range to cater for a variety of sandwich options. These range from the traditional triangular sandwich skillet, through to wraps and baguettes.

FRONT LOADING SANDWICH PACKS

LONGER LIFE SANDWICH PACKS

appealable

Our patented Appealable self-seal sandwich pack range can extend the shelf-life of a product to 2 days without the requirement for a sealing machine. The self-seal packs have an adhesive strip that, once uncovered, seals the pack, providing tamper evidence and reducing air flow to the sandwich within.

APPEALABLE SANDWICH PACKS

PRODUCT	SKU	MATERIAL	DIMENSIONS (L x W x H)	CASE QTY.				
Wildlife Appealable Sandwich Pack	10241	FSC® certified white board, printed design to exterior. Non-GMO PLA window	125.5 x 75/65 x 125.5mm	500	●	●	●	●

CHILLED FOOD-TO-GO

Our chilled food-to-go ranges balance sustainability and functionality, to align with customers' environmental goals and keep food fresh.

The chilled food-to-go market is expanding into a wider variety of foods and different day parts. In line with healthier lifestyle trends, a broader spectrum of chilled vegetarian and vegan dishes are available, and larger brands are now providing such options.

Chilled food-to-go packaging is designed to showcase fresh food. We offer a variety of formats, shapes and sizes that can be used for instant serve back-of-house and are also suitable for in-line production by packer processors. We provide solutions with stability, wide apertures for filling, and which can be nested for space efficiency.

Chilled food is often enjoyed on the go, so convenience and ease of use are essential. Our ranges are designed with efficient opening and the ability to re-close. Our UK manufactured multi-food pots are available with tight fitting rPET anti-mist lids so that they can be re-sealed to keep the contents fresh. All our rPET lids also contain a minimum of 75% recycled content.

Shelf-Life

Extended shelf-life packaging within the chilled food-to-go category provides options to reduce food waste by keeping food fresher for longer. We have self-seal and machinery sealed options, paired with countertop and free-standing machines to suit your requirements.

On-Shelf Appeal

Product visibility is vital to consumers when selecting food. Our product designs within this range showcase wide apertures, over the edge windows, and the ability to film seal. We offer lids with anti-mist coating that minimise condensation in a chilled environment to maximise visibility. Our Stagione® and Fuzione® ranges are excellent examples of this.

Standing out on-shelf is as important as product visibility. Our chilled food-to-go ranges have wide printable areas for branding or labelling. Shape and format can also increase shelf appeal and improve shelf density. For example, our Stagione® range combines curved, organic edges with practical space efficiency and ease of stacking.

MULTI-FOOD POTS

Key Attributes

- UK manufacture
- FSC® certified materials
- Recyclable base and lid
- Superior grease resistance
- Stable and easy to use
- Wide aperture for easy filling
- Printed kraft, natural kraft and bespoke options
- Tight fitting lids for all sizes
- Clear anti-mist rPET lids with a minimum of 75% recycled content
- Simple to open and re-close
- Easy to hold and eat from

PRINTED KRAFT

Our printed kraft multi-food pots are made with FSC® certified white board. The printed kraft exterior and white, PE coated interior make the product easier to keep clean during filling. These pots are combination packed with rPET anti-mist lids, minimising SKUs and maximising space efficiency.

"FSC® Forest Management certification, offered by Colpac products, is a key purchasing decision factor for gaining listings into retail as it testifies responsible sourcing. This is important to us and our customers who are concerned about their environmental and social impacts."

Philippe Bodart, CEO at Nonna

NATURAL KRAFT

Our natural kraft multi-food pots are manufactured in the UK. This range is sold separately to corresponding rPET anti-mist lids, to offer the option of heat sealing the bases separately to lidding for either hot or cold food. The natural kraft artisan material is FSC® certified, showcases the recyclability of these products and offsets the contents perfectly.

LONGER LIFE SALAD BOXES

CHILLED FOOD-TO-GO

HEAT SEAL & MODIFIED ATMOSPHERE SALAD BOXES

Packaging needs to protect, preserve, and present the food just how you want it.

Packaging solutions such as heat seal and Modified Atmosphere Packaging (MAP) can extend food freshness for days (depending on contents). Additionally, the extended shelf-life reduces the requirement for daily distribution and can lessen the transport cost and carbon footprint.

A sealing machine is necessary for the secure sealing of heat seal and MAP packs.

HOT FOOD-TO-GO

The hot food-to-go packaging market continues to grow and diversify covering breakfast, lunch and dinner, options for hot snacking and food delivery.

The hot food-to-go market continues to grow. Consumers want sustainable solutions that keep food hotter for longer and are seeking flexibility in terms of reheating.

Microwave and Oven Heating

Retailers need sustainable packs that can be heated, from chilled or ambient, at home in a microwave and/or oven, and that can still be part of a recycling waste stream. Material choices for boards, coatings, and lids are key here.

Look out for our microwave and oven icons throughout this catalogue and online to see our range of products which are suitable for consumer cooking and reheating.

SUITABLE FOR
MICROWAVE

SUITABLE FOR
OVEN

Instant Serve

Piping hot food is served at street food establishments, events, and festivals. Packs need to be easy and safe to fill, greaseproof and/or leakproof, comfortable to hold and easy to eat from.

Hot Hold

Hot hold food has exploded in popularity, with hot cabinet displays becoming commonplace in supermarkets, forecourts and even vending machines. Hot hold packaging can have complex usage requirements including freezing after packing and processing, back of house regeneration, display in hot cabinets, and still retaining sustainable credentials.

SUITABLE FOR
HOT CABINET

Our recyclable, polypropylene lined, microwavable souper pots give great stability and have tight-fitting paperboard or polypropylene lids. Food from these pots can be eaten at point of purchase, after being stored in a hot-hold cabinet, or can be reheated later when consumers return home.

Quality and Sustainability

The market demands sustainable packaging that works across the supply chain, such as our award-winning Stagione® range. Its kraft, FSC® certified material creates a strong on-shelf impact and is recyclable after use. We have options suitable for hot hold, microwave, and oven reheating too.

Delivery

We understand the importance of well-presented food arriving at the customer's door. Our high-grade materials offer an attractive artisan style of packaging to represent premium brands.

Leakproof designs such as webbed corners and secure closures including tight-fitting lids, ensure products are secure throughout transport. Our packaging retains heat and includes vented lids to reduce condensation so that food can be delivered in optimum condition.

POTS

COMPOSTABLE SOUPER POTS

Compostable souper pots are made from commercially compostable printed kraft board and are PLA lined.

Their environmental credentials do not compromise their performance. One of our customers even uses them for grow your own herbs!

They are perfect for events and venues where there is an option to manage a closed loop composting system, offering the composting waste stream on-site for consumers.

Colpac partners with companies to offer on-site composting solutions.

Talk to a member of our team for details.

Enquire about bespoke items made with alternative materials which can still be heat sealed, safely used in ovens and recycled after use.

"The new packaging from Colpac allows us to offer our bestselling meals in a simple, convenient format. The initial launch has gone very well and we're looking to utilise the packaging for other concepts and customers."

**Julie Nisbet, Managing Director
at Strathmore Foods**

MULTI-FOOD BOXES

Microwaveable multi-food boxes are a versatile solution for instant serve, takeaway and delivered food.

Our range has colour options including kraft and white, as well as a variety of sizes.

Whether you want to have a protein and salad or side in the same packaging, or you need the consumer to microwave at home or the office, we have a solution for you.

Our compostable multi-food boxes are made from compostable paperboard and have a PLA lining.

As they are made from compostable materials, leftover food is not a contamination issue. They are perfect for events and venues where there is an option to manage a closed loop composting system.

Colpac partners with companies to offer on-site composting solutions. Talk to a member of our team for details.

TOWER TRAYS™

Multi-functional packaging
for flexible foodservice

Our Tower Trays™ have been redesigned to bridge the gap between dine-in and takeaway. They can be used as standalone trays for consumers to eat from straight away, or can be locked together to form a box-to-go.

- Standalone trays or can be locked together in seconds
- Flexible usage with interchangeable sizes
- Space efficient in storage back-of-house
- Unique silhouette for visual appeal
- UK manufactured from FSC® certified, recyclable and compostable material

CONES & SCOOPS

Cones are the ultimate packs for hand held food. As well as traditional newsprint and kraft cones, we offer cones with a dipping corner, perfect for sweet or savoury sauces.

We offer scoops in a range of sizes and designs that are suitable for fries, wedges and even vegetable snacks. Our scoops have stable bases and can easily be hand held on-the-go.

PARTY

Our party range showcases some of the most vibrant designs in the party arena. From our ever popular Jungle Lion & Friends, through dinosaurs, space aliens, seasonal meal boxes to a rainbow of colours, we have something that will appeal to everyone.

Party Meal Boxes and Activity Kits

Our ranges of meal boxes and activity kits have been keeping children entertained for over 30 years, with vibrant designs and pre-prepared activity kits.

Designing for children is key to our range. We have meal boxes to suit young children, such as our bestselling Jungle Lion & Friends and Under the Sea meal boxes, as well as ranges suitable for older children, such as our dinosaur, football and circus designs.

Our range of coloured meal boxes can even cater for teenage and adult parties for gifts to take home.

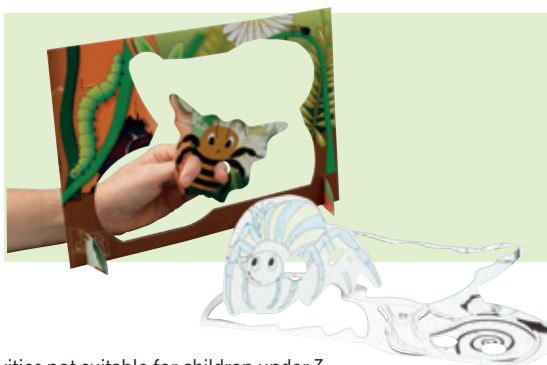

Our activity kits are specifically designed to engage youngsters. They include items such as masks, activity books, colouring sheets, finger puppets, and pop-out and build toys.

Quality and Sustainability

Designed, printed, and manufactured in the UK, we manage the quality of our meal boxes and activity packs. All our meal boxes are food safe and produced at our UK BRCGS AA+ rated site.

The future of our planet and the impact of our packaging on the environment has always been at the forefront of our product design. Our meal boxes are made from FSC® certified paperboard, and are recyclable and compostable. Our kits include sustainably sourced FSC® certified cardboard toys and activities, manufactured to CE and UKCA requirements.* They entertain and delight younger diners, whilst helping to protect the world for the next generation.

Custom Made

Our creative team loves coming up with new design ideas and developing bespoke solutions for our customers. All you need to do is choose a product from the range or discuss a bespoke design and size. We will take care of the rest.

MACHINERY

Reduce Food Waste with Packaging Machinery

Packaging plays a huge part in reducing food waste by increasing the shelf-life of food contents. Using sealing machinery can extend food shelf-life by keeping it fresh for multiple days* and supporting the reduction of food waste.

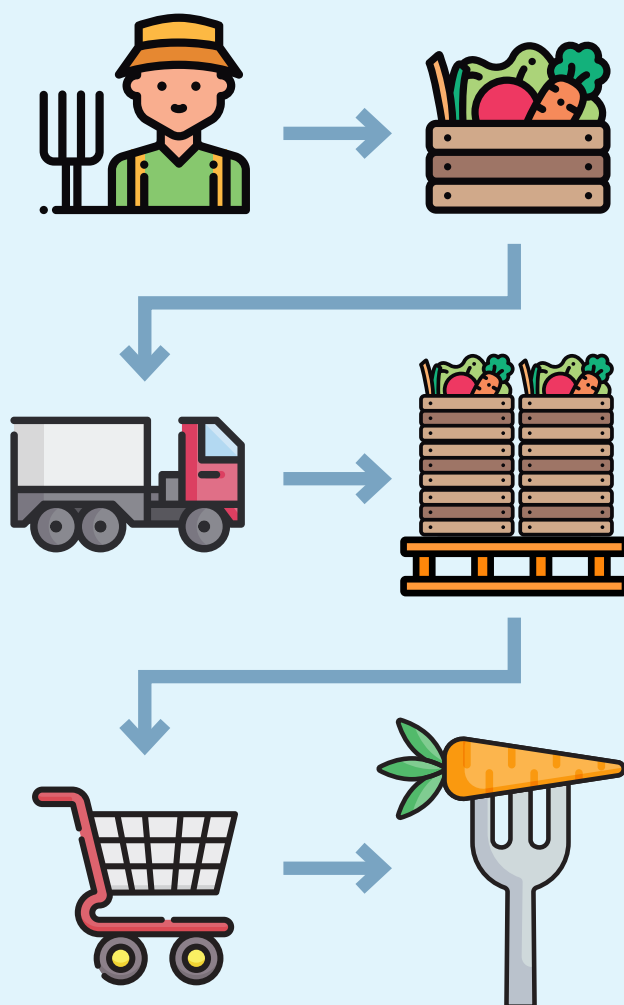

We offer sealing machinery and associated tooling to extend shelf-life in a variety of food production and processing environments. The right packaging machinery can help to increase productivity and efficiency back-of-house or on a production line.

We can support you in selecting suitable machinery, using our in-depth knowledge and carrying out full training.

Visit machinery
webpage

Food waste occurs throughout the supply chain, from the production stage to final household consumption.

FAO, UN - Oct 2019

* We recommend that customers conduct product testing for specific ingredients using our machinery and packaging to determine optimum shelf-life. Contact us for support.

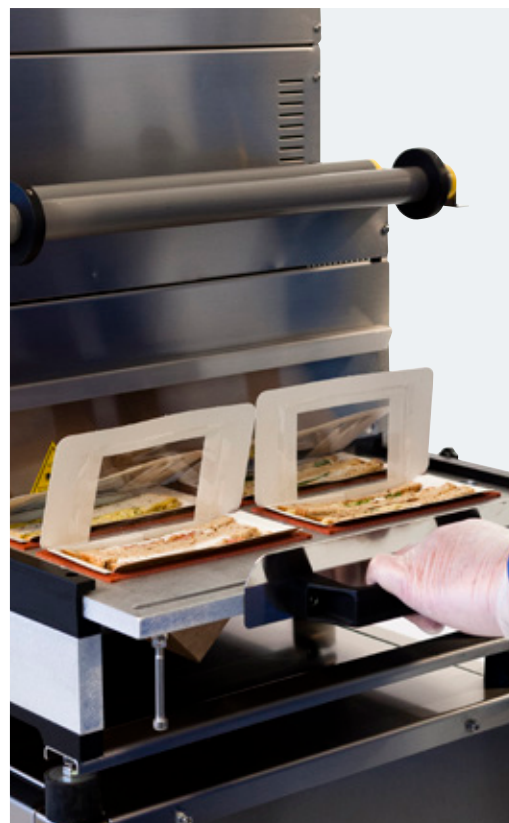

HEAT SEAL MACHINERY

We offer specialised machinery to heat seal our packaging.

Heat sealing packaging can increase food shelf-life by several days, extending the time in which it can be transported, sold, and consumed. When packaging is heat sealed, it is pressed closed using a hot sealing machine. In doing so, an air-tight seal is created around the edge of the pack to reduce oxygen flow.

Many of our stock products are suitable for heat sealing, including a variety of sandwich packs, wrap packs, and salad boxes. Products across our Stagione®, multi-food pots, and souper pots ranges can be sealed for extended shelf-life using profile heat sealing.

HEAT SEAL	PRODUCT	SKU	PRODUCTION SPEED	SEALING CAPACITY	DIMENSIONS (L x W x H)	WEIGHT	POWER
	ColSeal™ Impulse Sealer	11346	Variable	Length <200mm in width, optional 300mm available	310 x 80 x 140mm	2kg	230V x 1-phase x 50Hz

MODIFIED ATMOSPHERE MACHINERY

We offer machinery to seal Modified Atmosphere Packaging and extend shelf-life even further.

Modified Atmosphere Packaging (MAP) is a shelf-life extension technique which is achieved by replacing oxygen with a protective gas mix within a sealed pack. The removal of oxygen inhibits the growth of microbes and slows food decay.

We have installed MAP sealing machinery with food manufacturers and processors around the world.

Our ColMAP™ packaging includes sandwich packs, trays, and boxes. This has been developed by our in-house team, working closely with our machinery suppliers to maximise effectiveness. Our MAP products are made from board that is laminated with a high barrier, multi-layer film which is suitable for food grade gases.

We also offer skinned trays using heat seal or MAP methods. These products can be recycled once the peelable film has been removed.

MAP	PRODUCT	SKU	PRODUCTION SPEED	SEALING CAPACITY	DIMENSIONS (L x W x H)	WEIGHT	POWER
	ColMap™ CT350VG Semi-Automatic Sealer Basic	11766	<400 units/hour (subject to load and reload and pack size)	350 x 270mm	500 x 690 x 780mm	100kg	230V x 1-phase x 50Hz x 11A

COMPOSTABLE

The paperboard material in these products is commercially compostable within 90 days (EN13432 standard), where facilities are available.

COMPOSTABLE WINDOW

The film material used for these products is commercially compostable within 90 days (EN13432 standard).

RECYCLABLE

The plastic lids/window films used for these products are recyclable.

RECYCLED LID

The lids for these products are made from recycled plastic material (rPET).

RECYCLABLE BOARD

The board for these products is recyclable.

RECYCLED BOARD

The board for these products is made from recycled material.

SUITABLE FOR MICROWAVE

The product is suitable for microwave use.

SUITABLE FOR OVEN

The product is suitable for oven use.

SUITABLE FOR HOT CABINET

The product is suitable for use in hot cabinets.

SUITABLE FOR FREEZER

The product is suitable for freezer use.

SHORT SHELF-LIFE

Products with a shorter shelf-life.

LONGER SHELF-LIFE

Product with a longer shelf-life.

EXTENDED SHELF-LIFE

Products with an extended shelf-life.

Glossary

In our material descriptions we use abbreviations, this glossary explains the materials.

GMO - Genetically Modified Organism

PE - Polyethylene

PET - Polyethylene Terephthalate

PLA - Polylactic Acid

PP - Polypropylene

Although Colpac makes every reasonable attempt to test its products for a range of typical applications, Colpac cannot control the specific applications for which its products are used. Therefore, it is the customer's responsibility to test the suitability of a Colpac product for the customer's specific application.
